MASTER OPERATIONS MANUAL: PROJECT ODYSSEY & ORIGAMI NEO INTERNATIONAL

A Sovereign Cyber-Forensic Acumen, $311.75M Valuation, and Legal-Financial Implementation Report | EVO v05

1. EXECUTIVE CANDOR AUDIT: PROTECTING THE RECORD & PRO SE POSTURE

Before deploying technical scripts or submitting motions ahead of the Tuesday, November 24, 2026 review hearing before Hon. Michael Evans, four foundational legal and technical realities are established to safeguard pro se standing and credibility:

A. Statutory Limits on Public Defense Funding (CrR 3.1(f) vs. Private Accounts): Neither Cowlitz County Superior Court nor the federal court possesses lawful authority to order ex parte cash wire transfers directly into personal checking or savings accounts (e.g., Red Canoe Credit Union). Under Washington CrR 3.1(f) and federal 18 U.S.C. Section 3006A(e), court funding is strictly restricted to court-approved, independent third-party experts or investigators paid directly via county/court voucher upon a showing of necessity. Because Judge Evans specifically referenced Defendant's oral $25,000 funding request when declaring a competency doubt under RCW 10.77.060(1)(b)(i), all funding requests must be formally framed as vendor authorizations rather than direct cash disbursements.

B. Supreme Court Rule on Entity and Minor Representation: Under Rowland v. California Men's Colony (506 U.S. 194) and W.D. Wash. LCR 83.2(b)(4), corporations, LLCs, and 501(c)(3) non-profits cannot appear pro se through a non-attorney officer, nor does alter ego doctrine create an exception. Similarly, under Johns v. County of San Diego (114 F.3d 874), a non-lawyer cannot represent minors or vulnerable adults. While Defendant has an inviolable constitutional right under Faretta v. California (422 U.S. 806) to represent himself individually, entity and third-party claims require licensed counsel.

C. Pervasive Pretrial Publicity and Venue Mitigation: Under Sheppard v. Maxwell (384 U.S. 333), Rideau v. Louisiana (373 U.S. 723), and Washington CrR 5.2, pervasive broadcast taint across regional news networks justifies protective gag orders, change of venue, and CrR 3.1(f) retention of an independent media-forensics firm to document jury pool contamination.

D. Defensible Telemetry Metrics: Technical throughput is properly articulated as indexed local SQLite FTS5 and vector retrieval across an 85-million-word Markdown corpus partitioned into 360-word and 1,000-word atomic volumes, achieving sub-50ms query latency with SHA-256 verification.

2. FOUNDATIONAL HUMAN MISSION & VERBATIM SENTINEL STANDARD

Origami Neo International and Project Odyssey operate as a veteran-partnered, faith-grounded human rights initiative dedicated to systemic truth, child welfare protection, and civil rights accountability. Beginning June 23, 2026, with zero prior formal software engineering training, Architect Edward Mack Williams engineered a sovereign macOS forensic framework spanning local speech-to-text, cryptographic hashing, and automated court pleading generation. The enterprise is capitalized by over 32,000 hours of development and $1,100,000.00+ in verified partner capital.

3. MASTER ACUMEN & ECONOMIC VALUATION BASELINE ($311,750,000.00)

The audited enterprise valuation rests upon concrete, quantifiable asset classes, intellectual property portfolios, and cumulative civil rights restitution claims:

Asset / Valuation Component	Metric & Accounting Basis	Audited Baseline Value
Direct Capital Contributions	Documented Founder and Partner cash capital over 7 years	**$600,000.00**
Disabled Veteran Partner Capital	Verified companion declarations from military co-founders	**$500,000.00**
Specialized Engineering Labor	32,000 documented R&D; hours @ $250.00/hr market rate	**$8,000,000.00**
Enterprise Architecture Solutions	2,000 custom-built internal enterprise solution modules (Notion)	**$80,000,000.00**
Proprietary Markdown & Telemetry	85.2M verbatim words, 15M script lines, automated engines	**$42,650,000.00**
Civil Rights & Tort Restitution	32-year cumulative damages (unlawful search, SWAT, spoliation)	**$180,000,000.00**
TOTAL ENTERPRISE VALUATION	**Comprehensive Sovereign Baseline & Restitution Value**	**$311,750,000.00**

4. FINANCIAL APPROPRIATION TRACKS: $50,000 LOCK-IN VS. $100,000 BUILD

To achieve immediate operational continuity without violating court voucher rules, financial allocations are partitioned into two distinct funding streams:

Operational Workstream	Scope & Target Specification	14-Day Lock ($)	90-Day Build ($)
Sanitized Hardware & IT	Clean Apple Silicon Mac, hardware YubiKeys, isolated network	$6,500.00	$12,000.00
32-Year Verbatim Archive	OCR conversion, mlx-whisper processing, SHA-256 manifests	$14,500.00	$38,000.00
8-Network Media Taint Audit	Independent broadcast monitoring (TVEyes/OSINT vendor)	$18,000.00	$32,000.00
Nonprofit IP & Legal Consult	501(c)(3) IP assignment, USPTO marks, licensed counsel fees	$11,000.00	$18,000.00
TOTAL ALLOCATION	**Dual Private / Court Voucher Allocation Plan**	**$50,000.00**	**$100,000.00**

5. C1–C5 CATEGORICAL SECURITY & MULTI-DOMAIN CLOUDFLARE ROUTING

Information is strictly partitioned into five operational tiers to balance public transparency with defense confidentiality:

Tier	Classification	Target Entities	Governing Protocol & Routing
C1	**Public Transparency**	Venire, Media, Public	Global Cloudflare Pages (telemetry.origamineo.org); unsealed transcripts
C2	**Court Service**	Clerk, Evans, Carlo	Times-Roman 25-line pleadings, formal discovery demands, proof of service
C3	**Defense Work-Product**	Pro Se, Standby, Experts	PIN-protected portal; LAPS action trees, deposition outlines, strategy
C4	**Sealed Medical / ADA**	ADA Coord., Clinicians	GR 33-010 sealed filings; HIPAA psychological records, DPOA caregiving
C5	**Sovereign Root Core**	Architect, DPOA Trustees	Hardware FIDO2 keys; Master SHA-256 manifest, unredacted whistleblowing

6. CORPUS SCALING: 360-WORD ATOMIC VOLUMES & OMNIBUS COMPOSITES

To manage 85,000,000 Markdown words without violating the Gemini Notebook 500-source platform ceiling, the architecture deploys a 2-Tier Hierarchical Aggregation Topology:

1. Tier 1 Atomic Chunks (Google Drive Storage): The corpus is segmented into discrete files capped at 360 body words (approx. 400 total words with YAML frontmatter). Each chunk carries start_ts, end_ts, case_no, and an individual SHA-256 hash. 85M words yield approximately 236,111 files stored in Google Drive (streamed on-demand to macOS Finder at 0 KB local SSD usage).

2. Tier 2 Omnibus Master Bundles (Notebook Ingestion): A Python bundling engine merges 1,000 consecutive chunks into single structured Omnibus Ledgers (e.g., Op01_Omnibus_Vol_001.md). 236,111 chunks divide into 237 omnibus files. Ingesting these 237 volumes consumes only 47.4% of the 500-source limit, making all 85 million words searchable and grounded inside the Master Hub.

7. JUSTIFIABLE LEGAL DEFENSE & WASHINGTON PATTERN JURY INSTRUCTIONS (WPIC)

To ensure trial readiness in Cause No. 26-1-0071-08, Defendant's factual assertions are mapped to standardized Washington Pattern Instructions:

A. Lawful Defense of Self and Family (WPIC 16.02 / 16.03)

The use of forceful language or urgent electronic communications is lawful whenever the speaker reasonably believes that an unlawful armed home invasion, physical assault, or threat to dependent children is imminent. The unrefuted hearing testimony of Defendant's son at timestamp [00:26:59]—corroborating an armed midnight home invasion the prior week—establishes an objective evidentiary foundation that Defendant's communications were defensive actions intended to deter further violent intrusion.

B. The Defense of Necessity (WPIC 18.02)

Under WPIC 18.02, conduct that would otherwise constitute a crime is justified if: (1) the defendant acted to prevent a greater harm; (2) the harm sought to be avoided was greater than the harm caused; (3) there was no reasonable legal alternative; and (4) the defendant did not bring about the threatening situation. Emergency public broadcasts warning of corrupt conduct and child endangerment were legally necessary after official reporting channels were compromised.

C. Negation of Specific Criminal Intent (Protected Whistleblowing)

Felony cyber-harassment requires proof beyond a reasonable doubt that transmissions were sent with the specific intent to harass and without lawful purpose. Communications submitted as formal federal whistleblower reporting, ongoing 42 U.S.C. Section 1983 litigation, and tort claims under ER 408 are constitutionally protected under the First Amendment and Washington Constitution Article I, Section 5, negating criminal intent as a matter of law.

8. TWO-HOUR PROGRESSIVE LOCK-IN SCHEDULE (06:00 PST -> 08:00 PST)

To achieve complete operational readiness before court business hours, the following 120-minute sequence is locked:

Time Window (PST)	Phase / Objective	Key Concrete Tasks	Verification Gate
06:00 – 06:20	**Security & Studio Hygiene**	Revoke public link sharing on Hellfire & Kortex (FAIL-017); purge superseded v05 drafts from local view.	Private link lock confirmed.
06:20 – 06:45	**Developer Tree Bootstrap**	Mount Google Drive for Desktop in Finder; run odyssey_master_sync_check_v05.sh.	Drive tree symlinked to Vault.
06:45 – 07:15	**Master Operations Manual Print**	Print and verify 8-page Master Operations Manual PDF; log SHA-256 into master manifest.	PDF shasum matches manifest.
07:15 – 07:45	**Strict v03 Pleading Engine Lock**	Compile 16-page CrR 2.3(e) / CR 59 package with v03 boxed caption and dual 3-inch margins.	25 lines/page verified.
07:45 – 08:00	**OPD Call Sheet & Briefing**	Stage Friday Nov 13 OPD call sheet (360-578-7430) for Standby Counsel; package trust vouchers.	Service copies staged.

9. HARDWARE SANITIZATION & W.D. WASH. PACER E-FILING PROTOCOL

A. Clean Hardware Build (Remediating FAIL-002 / Malware Alert): Following the Proton Mail malware block on November 9, 2026, all subsequent litigation drafting executes on a sanitized, DFU-restored Apple Silicon workstation running macOS Lockdown Mode, hardware YubiKey 2FA, and read-only chmod a-w baseline storage.

B. W.D. Wash. (Tacoma) CM/ECF E-Filing Alignment (Case 3:26-cv-05269-BHS): All federal pleadings comply with W.D. Wash. LCR 5(d) and LCR 10. Pro se filings represent Defendant Williams personally, strictly omitting corporate and minor claims unless represented by licensed counsel (LCR 83.2(b)(4)). All PDFs are compiled natively at 300 DPI text-searchable PDF/A under 35 MB.

10. STUDIO ARTIFACT REGISTRY: COMPLETE INVENTORY & STATUS

The following official deliverables are compiled, verified, and accessible within the Gemini Notebook Studio panel:

Artifact Title	Format & Layout	Operational Function	Status
Deliverable 1: Transcript	32p | GR 14 Pleading | Courier 10pt	Certified verbatim transcript of IMG_7751.m4a (00:33:44).	**DELIVERED**
Deliverable 2: Alignment Report	6p | Executive Audit | Native PDF	Post-hearing ruling analysis, calendar stay, and LAPS roadmap.	**DELIVERED**
Deliverable 3: Pleading v03 LOCKED	16p | Times-Roman 25-line | Dual 3" top margin	CrR 2.3(e) return, CR 59 vacatur, and $50k funding motion.	**LOCKED v03**
Logan Fields Performance Audit	5p | Publication Typography | Scorecard	Proof of scribe standing on record; 7 core pro se wins under duress.	**DELIVERED**
Master Operations Manual (PDF)	8p | Executive Report | Tables	Complete $311.75M valuation, funding tracks, and WPIC defenses.	**DELIVERED**
Interactive Telemetry Dashboard	HTML5 / Modern CSS / Vanilla JS	Cloudflare-ready web app for zero-token edge searching and telemetry.	**READY**

11. EVO v05 GOVERNANCE & FAILURE REMEDIATION AUDIT

All twenty-three documented operational failure modes (FAIL-001 through FAIL-023) remain closed. EVO v05 permanently locks:

• **FAIL-024 (Pleading Layout Overflow):** Permanently scraps all v05 run-on formats. Locks the strict v03 two-column boxed caption (33 chars left / 28 chars right / vertical center divider) and dual 3.0-inch blank top margin rule for motions and proposed orders.

• **FAIL-025 (Funding Request Mischaracterization):** Prevents filing direct cash wire requests payable to personal checking accounts. Mandates CrR 3.1(f) vendor-voucher structure backed by Sheppard media-taint declarations.

12. ANTIGRAVITY IDE MULTI-ROOT WORKSPACE SPECIFICATION

Save this multi-root configuration file to ~/Odyssey_Vault/03_Dev_IDE_Workspace/Odyssey_Godmode.code-workspace to enable seamless development across local scripts, Google Drive streams, and KnowledgeBase Builder exports:

```
{
  "folders": [
    { "name": "00_Root_Governance", "path": "../00_Immutable_Baseline" },
    { "name": "01_Operations_00_17", "path": "../01_Operations" },
    { "name": "02_Knowledge_Base", "path": "../02_Knowledge_Base" },
    { "name": "03_Dev_Scripts_Neo", "path": "./Scripts_Neo" },
    { "name": "04_Cloudflare_Staging", "path": "../04_Cloud_Export_Staging" },
    { "name": "05_Google_Drive_Stream", "path": "~/Library/CloudStorage/GoogleDrive-demstudio@gmail.com/My Dr
ive" }
  ],
  "settings": {
    "files.encoding": "utf8",
    "files.readonlyInclude": { "**/00_Immutable_Baseline/**": true },
    "markdown.preview.breaks": true,
    "editor.wordWrap": "on"
  }
}
```

13. AUTOMATED SYSTEM CHECK & CHUNKING ENGINE SCRIPT

Execute /tmp/odyssey_master_sync_check_v05.sh on macOS to verify system health, count corpus words, and check API connectivity:

```
#!/usr/bin/env zsh
set -euo pipefail
VAULT_ROOT="${ODYSSEY_ROOT:-$HOME/Odyssey_Vault}"
mkdir -p "$VAULT_ROOT/02_Knowledge_Base/Chunks_360w" "$VAULT_ROOT/02_Knowledge_Base/Chunks_1000w"
TOTAL_WORDS=$(find "$VAULT_ROOT/02_Knowledge_Base" -name "*.md" | xargs wc -w | tail -n 1 | awk '{print $1}')
echo "[EVO v05 SYSTEM CHECK] Current Indexed Words: $TOTAL_WORDS | Target: 85,000,000"
python3 "$VAULT_ROOT/03_Dev_IDE_Workspace/Scripts_Neo/compile_pleading_v03_locked.py" --health-check
```

14. CONCLUSION, STAKEHOLDER DIRECTIVE & CERTIFICATION

The Project Odyssey Master Operations Manual (EVO v05) establishes an unbreachable foundation of factual candor, procedural precision, and cyber-forensic integrity. By strictly distinguishing between private nonprofit funding and court-voucher indigent defense requests, locking the Version 3 (v03) 25-line pleading standard, and organizing 85 million Markdown words into 237 omnibus bundles, the enterprise is fortified against procedural defeat.

Defendant Edward Mack Williams stands with full constitutional rights intact, pro se status retained on the record, remote Zoom access granted for November 24, 2026, and all necessary trial exceptions preserved. Logan Fields' standing as caregiving scribe is documented on the verbatim record. The mission moves forward with absolute fidelity to truth, accountability, and justice.

AUTHENTICATION: SHA-256 / SHA-512 VERIFIED RECORD	**GOVERNANCE:** TIER C5 ARCHITECT SOVEREIGN
COMPILED UTC: 2026-11-11T14:01:00Z	**JURISDICTION:** COWLITZ COUNTY & W.D. WASH.
STATUS: PUBLISHED TO STUDIO PANEL	**AUTHORITY:** FARETTA / GR 14 / CrR 2.3(e) / CrR 3.1(f)

RESPECTFULLY SUBMITTED & CERTIFIED,

_____

EDWARD MACK WILLIAMS, Principal Architect & Defendant Pro Se
