DIAGNOSTIC EVIDENTIARY INTEGRITY, ADA COMPLIANCE & CORPORATE GOVERNANCE REPORT

Master Implementation Plan, Forensic Auditing Scope & Truth-Harm Verification Architecture

Prepared For: Edward Mack Williams (Pro Se Principal), Master Sergeant Charles Fields (DPOA / Legal Assistant Oversight), Logan Michael Fields (Corporate Governor, D.E.M. & Associates LLC), and Conflict-Free Standby Counsel
Referenced Matters: Cowlitz County Superior Court Case No. 26-1-0071-08 (and Cause Nos. 17-3-00004-8, 17-3-00003-8) | U.S. District Court (W.D. Wash.) Case No. 3:26-cv-05269-BHS
Date & Location: November 10, 2026 | Castle Rock, Washington

EXECUTIVE MANDATE & OPERATIONAL PURPOSE

Following the seizure of legacy hardware under a disputed search warrant and the deployment of a freshly wiped Apple Silicon workstation, this report establishes a verifiable, clean-room evidentiary architecture. It aligns verbatim court transcription, cryptographic chain-of-custody auditing, Americans with Disabilities Act (ADA) litigation accommodations (42 U.S.C. § 12132; RCW Ch. 74.34), and corporate asset governance for D.E.M. & Associates LLC into a single auditable record ready for judicial inspection and stakeholder demonstration.

1. Master Implementation Plan (Clean-Room Workstation Rebuild)

To prevent data contamination, cloud-sync duplication, or path drift during litigation and corporate recovery, deployment on the freshly wiped macOS Golden Gate Beta environment follows five gated phases. No cloud synchronization agent is permitted to touch local directories until cryptographic baselines and directory skeletons are locked.

Phase	Operational Scope	Technical Execution	Evidentiary Gate
Phase 1 OS Hardening	Clean macOS baseline & security perimeter	Enable FileVault full-disk encryption, macOS Application Firewall, and Gatekeeper/XProtect; install Xcode CLI tools, Homebrew, `ffmpeg`, `sqlite`, and `python@3.12`.	Zero unverified third-party binaries; system Malware Block active.
Phase 2 Neo Vault Skeleton	Single-Source-of-Truth (SSOT) directory tree	Provision canonical vault root (`Project Odyssey - OPS - LAPS - Neo Vault - 2419`), Operations `001` – `017`, and dedicated `Scripts - Neo` / `Gemini Chats` folders.	Strict prohibition on Desktop file storage; deterministic paths.
Phase 3 Antigravity Workspace	Multi-root IDE & local offline transcription engine	Bind `Project_Odyssey_Godmode.code-workspace`; isolate `mlx-whisper` (`whisper-large-v3-mlx`) and `reportlab` inside `.venv_forensic_whisper`;	Offline Apple Silicon processing; zero external third-party audio leakage.
